

Anatech on Google Earth

Anatech from Sittard (The Netherlands) has been selected by Syntens (www.syntens.nl), the business innovation network, for a place on Google Earth.

Anatech owes this distinction to its ranking in the Top 100 innovative SMEs for 2006. It was selected jointly by Syntens en 'bizz', the business trade paper.

Anatech develops and produces analytical instrumentation for chemistry and physics laboratories in both the areas of research and quality control. With 24 employees Anatech supplies each year hundreds of advanced instruments to various customers worldwide.

Under the brand name Analyte[®], also analytical services to companies in the plastics and the pharmaceutical industry are offered.
